EMPLOYMENT

July 2015 – Feb 2016

SOFTWARE ENGINEER – SENNA
- Responsible for building out mobile iOS and Android platforms using Ionic Framework.
- Managed and build out features on our Rails API.
- Worked on landing page and integration with Mixpanel analytics on web and mobile.
- Developed SENNA app for Apple TV using Apple's TVJS and TVML templates.

Feb 2015 – May 2015

WDI | FULL STACK WEB DEVELOPER – General Assembly
- Savage – *An iOS role playing battle game built on React Native that uses geo-location and a steps counter to trigger events*
  - Managed users accounts and stats using a RESTful API built with Ruby on Rails and deployed using Heroku. Tracked user's steps by calculating their movement using geolocation.
- Skillmix – *A social-networking web application that allows users to find other users that have particular skills they can teach you and skills they want to learn from you*
  - Created the matching algorithm to match users to users based on skills they know and skills they want to learn. Allow users to create accounts and upload a profile image through Amazon Web Services S3.
- Featur – *A single-page web application, built with Backbone.js, that allows a user to search for a music artist to find collaborators and the shared songs, create and save playlists, and playback songs*
  - Parsed and displayed data on particular artists and their collaborators via the Spotify API. Populated a PostgreSQL database with user-added playlists and songs using Sequelize on a Node.js server.

May 2013 – Sep 2014

SYSTEMS ADMINISTRATOR – Toko IT
- Specializing in small and medium-sized businesses and Electronic Medical Records for medical practices.
- Configured and administered Windows system. Troubleshooted and managed, Hardware, Software and Networking issues for multiple clients.
